EDUCATION

National Institute of Technology Delhi

Bachelor of Technology, *Electrical Engineering* – CGPA: 8.25/10

New Delhi, India

Graduating May 2028

Govt. Model Sr. Sec. School, Sector 35D

Class 12th, CBSE Percentage: 92.8%

Chandigarh, India

2023 – 2024

TECHNICAL SKILLS AND INTERESTS

Programming Languages: Python, Java, C++, SQL, JavaScript, HTML5, CSS3

Web Development: Node.js, React.js, Vue.js, Flask, Tailwind CSS

Tools: Git, GitHub, VSCode, Jupyter Notebook, Canva, LaTeX, MATLAB, Simulink

Databases: MySQL, SQL, MongoDB, Relational Database Concepts

AI/ML: Machine learning, Model Deployment, Data Preprocessing, Predictive Learning

Libraries/Frameworks: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, Express.js

CS Fundamentals: Data Structures, Algorithms, Object-Oriented Design, Problem-Solving, System Design

EXPERIENCE

Tadpole Projects, IIT Delhi – Research Intern

June 2026 – Present, New Delhi

- Engineered simulation models for an electric two-wheeler, evaluating battery, motor, controller, and drivetrain performance across multiple operating conditions.
- Conducted system-level analysis of efficiency and vehicle dynamics to support design optimization.
- Collaborated on technical research, component evaluation for next-generation EV development.

Edunet Foundation, AICTE – Data Analytics Intern

August 2025 – September 2025, Remote

- Developed an end-to-end carbon emission prediction system using AI/ML and sustainability datasets.
- Performed feature engineering, model optimization, and data visualization using Python.
- Analyzed emission trends to enable data-driven sustainability decisions.

PERSONAL PROJECTS

SonicSync - Full-Stack Music Streaming Platform

- Programming Languages & Technologies:** JavaScript, React.js, Tailwind CSS, Redux Toolkit, Node.js, Express.js, MongoDB, JWT Authentication, REST APIs
- Developed a responsive music streaming platform featuring 1,000+ tracks, instant search, real-time audio playback, playback controls, playlists, favorites, and artist discovery.
- Managed application state and playback using Redux Toolkit with asynchronous API integration.
- Built secure REST APIs with Node.js, Express.js, MongoDB, and JWT authentication, along with an admin dashboard for song management and deployment on cloud platforms..

AI-ML based Forest Fire Detection System

- Programming Languages & Technologies:** Python, TensorFlow, Scikit-learn, Streamlit, Pandas, NumPy, Matplotlib, OpenCV
- Developed an AI-powered forest fire detection system for early wildfire prediction using environmental and image data.
- Achieved 96.4% accuracy, 95.8% precision, 96.1% recall, and a 95.9% F1-score using optimized ML models.
- Built an end-to-end Streamlit pipeline for preprocessing, training, evaluation, and deployment.

PROGRAMMING ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Amazon ML Summer School Mentee:** Qualified among 1.5 lakh+ applicants.
- Solved above 300+ Questions based on Data Structures & Algorithms among platforms including Codeforces and LeetCode.
- Secured Batch Rank 7 based on cumulative academic performance.
- Qualified for multiple technical hackathons, collaborating on AI/ML and engineering-based problem-solving projects under time-constrained environments.
